TECHNICAL SKILLS

Full Stack Web Development | MERN Stack | React.js | Node.js | Express.js | MongoDB | Laravel | MySQL | PHP | Tailwind CSS | Material-UI | Stripe Integration | REST APIs | Multi-Tenant SaaS Architecture | VPS | cPanel | Hosting | WordPress | Elementor | Flutter | Git | GitHub | DevOps | CI/CD Pipelines | Docker | Linux Server Management | Nginx | Apache | GitHub Actions | Deployment Automation | Cloud Hosting | SSL Configuration | Domain & DNS Management

WORK EXPERIENCE

09/2024 – 09/2025

Full Stack MERN Developer

ScriptExp Private Limited

Project

- Developed and maintained scalable MERN stack applications for production environments.
- Designed RESTful APIs using Node.js and Express.js for dynamic data handling.
- Implemented multi-tenant architecture for SaaS-based systems.
- Integrated Stripe payment gateway for secure online transactions.
- Managed VPS deployment, cPanel hosting, and server configurations.

Technologies used: React | Node.js | Express | MongoDB | Tailwind CSS | Stripe | VPS | cPanel.

05/2025

React Developer (CUBA)

WaamTech

Project:

- Developed responsive front-end interfaces using React.js and Material-UI.
- Improved UI performance and reusability through component-based architecture.
- Collaborated with backend teams to integrate REST APIs efficiently.

Technologies used: React | Material-UI | REST APIs

EDUCATION

09/2022 – 09/2026

BS Software Engineering

COMSATS University Islamabad, Wah Cantt, Pakistan

Current CGPA: 3.74 (Predicted: 3.76)

FEATURED SAAS PROJECTS

EDUSAAS 360 (Final Year Project)

Multi-Tenant SaaS platform built using MERN stack enabling dynamic institute creation, role-based access control, and multi-branch data management.

- Designed dynamic permission system for institutes and branches.
- Implemented centralized billing and subscription logic.

- Developed secure authentication and multi-level dashboards.
- Technologies used:** MERN Stack | RBAC | Multi-Tenant Architecture.

KLTHUB – Korean Language Testing Platform (Self Product)

Institute-centric SaaS assessment platform built with Laravel for Korean language test delivery, scoring, and operational management.

- Built a complete Korean language testing engine with token/class-code access, timed exams, auto-scoring, and downloadable results/certificates.
- Developed advanced test-content management for admins/coordinators, including section/fragment/question builders with audio and TTS controls.
- Implemented multi-tenant institute operations with role-based dashboards, student/test assignment, billing (prepaid/postpaid), and performance/finance reporting.

Technologies used: Laravel, PHP, MySQL, Blade, Tailwind CSS, RBAC, Multi-Tenant (Institute-based) Architecture

Alixora – AI-Powered CRM & Marketing Automation Platform

Comprehensive business platform built on CodeIgniter focused on AI-enabled growth operations for builders, agencies, and service teams.

- Built a role-based CRM and automation ecosystem with dedicated portals for admins, builders, influencers, staff, and clients to streamline lead, sales, and customer operations.
- Developed an AI-driven growth engine featuring Smart Agents, poster/creative generation, ARC token wallet monetization, and plan/package approval workflows with coupon and receipt handling.
- Integrated end-to-end business operations with Facebook marketing automation, subscription/billing management, secure authentication/permissions, and performance dashboards with reporting analytics.

Additional full-stack and SaaS-based projects available upon request.

Achievements and Certificates

Prime Minister's Youth Laptop Scheme – Merit Awardee

Awarded by the Government of Pakistan based on academic performance and merit criteria.
